EDUCATION

Northeastern University, Khoury College of Computer Sciences, Boston, MA *September 2022 – Present*
Candidate for Bachelor of Science in Computer Science and Cognitive Psychology,
Minor in Experience Design, GPA: 3.4/4.0
Relevant Coursework: Object-Oriented Design, Game Programming, Introduction to Web Development, Cognition, Algorithms & Data, Design Process Context/Systems, Human Computer Interaction
Activities: Korean American Student Association (Member & Peer Mentor), Game Development Club (Member), Northeastern Valorant Game Changers Team (Player)

TECHNICAL KNOWLEDGE

Operating Systems: Mac | Windows | Linux
Languages: Java | TypeScript | React Native | C# | HTML | JavaScript | CSS | C++ | SQL | PHP
Software: IntelliJ | VSCode | Unity | GitHub | Microsoft Excel | Canva | DrRacket | Adobe Cloud

EXPERIENCE

Technical Production Intern, Raven Software/Activision, Middleton, WI *May 2025 – August 2025*

- Developed a Confluence-based onboarding hub with structured documentation and workflows to support future interns.
- Applied data organization and filtering skills to manage Jira tickets (tasks, bugs, epics) using JQL to create dashboards to display task progress, dependencies, and deadlines.
- Collaborated across engineering and art departments to identify blockers, dependencies, and cross-team requirements for new features.

Web Accessibility Specialist, Northeastern University, Boston, MA *January 2025 – May 2025*

- Creating comprehensive web accessibility audits and reports of the Northeastern Digital Scholarship Group's (DSG) projects and supported tools and platforms and implemented necessary accessibility changes using HTML and CSS.
- Developing a set of training and supporting materials including workshop curricula, research and project support materials, guidelines for internal documentation, public and internal accessibility reports, and will work directly with specific DSG projects on implementing digital accessibility recommendations.

Technology Intern, BDI Global, Skokie, IL *May 2024 – August 2024*

- Collaborated with underwriters to analyze cyber risk submissions for SafeLaw and SafeHealth programs, while also assisting in developing and executing marketing strategies for SafePro and SafeCommerce programs.
- Developed wireframes using Figma to enhance internal processes related to policy management and client communication, and assisted in documenting and refining workflows to improve the overall efficiency of the BDI team.
- Engaged in various Ad Hoc projects, including data analysis, industry research presentations, and competitor analysis, demonstrating flexibility and adaptability in handling tasks ranging from technical development to strategic planning.

Software Engineer Intern, TheBoard, Boston, MA *January 2024 – May 2024*

- Collaborated with a remote team of 5 other programmers to develop TheBoard's first cross-platform mobile application using React Native with TypeScript, ensuring compatibility with both iOS and Android.
- Implemented features and functionalities, such as the profile page/editor, comment section, and interactive like-button, in collaboration with UI/UX designers and backend developers; contributing to the overall user experience and app performance, ensuring a seamless and visually appealing interface.

Summer YPAL Facilitator, KAN-WIN, Chicago, IL *June 2021 – August 2023*

- Facilitated and organized remote clinic sessions for the Youth Peer Advocate Leadership (YPAL) Program, ensuring seamless communication and engagement among 20-30 participants during the COVID-19 pandemic.
- Led presentations and facilitated discussions on gender-based violence and its effects on marginalized communities.

PROJECTS – For a comprehensive overview of my projects and additional work, visit chloeylee.github.io.

Pip & Squeak | C#, UnityEngine *October 2024*

- Collaborated with a team of 4 programmers, artists, and game designers to create a two-player 2d puzzle platformer game in which players take over the control of two star-crossed mice (Pip and Squeak) and attempt to reunite with one another after a frightening cat encounter.

Hexagon Reversi | Java *October 2023 – December 2023*

- Developed a hexagonal Reversi game utilizing pair programming that used an aesthetically pleasing Kirby theme.
- Programmed AI computer player mechanics that could utilize 1 or any combination of 4 strategies, including a 'MiniMax' strategy.
